EDUCATION

Florida International University <i>MS in Information Technology, Software Development</i>	Miami, FL <i>Projected 2027</i>
Broward College <i>BAS in Information Technology, Web Development</i>	Davie, FL <i>2021</i>
Broward College <i>AS in Information Technology, Data Support</i>	Davie, FL <i>2018</i>

EXPERIENCE

Analyst, ERP Programmer <i>Broward College</i>	Jul. 2023 – Present <i>Davie, FL</i>
- Develops, maintains, troubleshoots, and enhances ERP systems supporting academic and administrative operations using Natural 9.1, SQL, and JavaScript. - Collaborates with programmers and analysts to resolve issues, improve features, and support reliable institutional tools.	
Technical Developer <i>Broward College</i>	Oct. 2024 – Present <i>Davie, FL</i>
- Serves in a temporary secondary role supporting implementation of Broward College's new Student Information System. - Translates technical updates, documents changes, and helps staff and students use new SIS tools effectively.	
Administrative Specialist, Computer Lab Assistant <i>Broward College</i>	2019 – 2021 <i>Davie, FL</i>
- Assisted students with computer science assignments, Microsoft Office, and programming coursework across HTML5, CSS, JavaScript, jQuery, SQL, PHP, Java, and Python. - Supported the CSIT department lab by troubleshooting student questions and reinforcing technical concepts through one-on-one assistance.	
Volunteer Software Development Intern <i>Broward College</i>	2019 – 2020 <i>Davie, FL</i>
- Planned and developed a WordPress plugin for the CSIT Broward College website. - Enhanced the Broward College Announcements Plugin for student D2L announcements and CSIT web pages.	
Augmented Reality Software Engineer <i>3D HoloGroup</i>	2016 – 2019 <i>Miami, FL</i>
Built immersive software experiences, developing hands-on experience with interactive technology and application development.	
Database Designer Intern <i>Code Explorers</i>	May – Aug. 2016 <i>Davie, FL</i>
- Converted unstructured data to structured files for database implementation. - Authored a Functional Requirements Document and created logical and conceptual ER models. - Delivered MySQL code for a secure database tracking teacher comments, grades, classes, locations, and students.	
Payroll Administrator <i>Power UP Personnel Services Inc.</i>	May – Aug. 2015 <i>Medley, FL</i>
- Processed weekly payroll for an average of 85 employees and maintained personnel files. - Entered pay rates, hours worked, and direct deposit information into the payroll register and employee database.	

LEADERSHIP

Organizer

2020 – 2025

PlutoHacks, Broward College

Davie, FL

- Helped organize Broward College's annual 24-hour hackathon, supporting logistics, mentorship, and participant experience.
- Contributed to entire event planning and execution.

PROJECTS

Mooric ERP | *React, TypeScript, Vite, Tailwind CSS, Framer Motion*

- Business ERP platform website with clear product messaging and a polished client-facing experience (mooricerp.com).

Power UP Personnel | *React, TypeScript, Vite, React Router, Leaflet*

- Staffing and recruiting site built to present services clearly and support lead generation (poweruppersonnel.com).

HACKATHONS

ShellHacks 2023 — Themis | *Winner* | HTML, CSS, JavaScript, PHP, Python, Google Cloud Vision

- Phishing defense tool that detects AI-generated text, logos, and suspicious email language (themis-vision.netlify.app).

ShellHacks 2021 — Local Coin | *Submitted* | Kotlin, Android Studio, Coin Routes API, Figma

- Mobile app helping newcomers understand, manage, and track cryptocurrency portfolios in one place.

BrickHack 7 — Theft Me | *Submitted* | Unity, C#, SteamVR

- Identity-theft game where players impersonate someone based on wallet contents and belongings.

Technica 2020 — BeBrave | *Winner* | HTML5, CSS3, JavaScript, Illustrator

- Interactive bullying-awareness scenarios for younger students (bebrave.space).

Silly Hacks 2020 — Mathwae | *Winner* | Python, Flask, JavaScript, Kintone

- Mathway.com lookalike that returns intentionally incorrect answers to discourage academic dishonesty.

Silly Hacks 2020 — Whack-a-Jerge | *Submitted* | Unity

- Stress-relief whack-a-mole game built to release bottled-up frustration.

ShellHacks 2020 — Art Tunes | *Submitted* | HTML5, CSS, JavaScript, PHP

- Web app that converts images into sound so blind users can experience art (arttunes.online).

PlutoHacks 2019 | *Winner*

- Winning hackathon submission; project not listed on Devpost.
